

Step 1.

Start with square-shaped paper. Turn on a diagonal. Fold in half to make crease in center of the paper, as shown, then open.

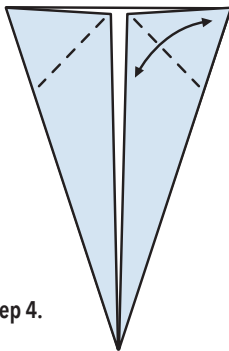

Step 2.

Take corners of paper and fold inward so two sides meet in the middle.

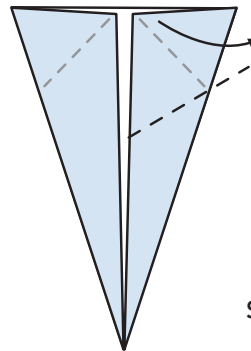

Step 3.

Fold the top triangle backwards.

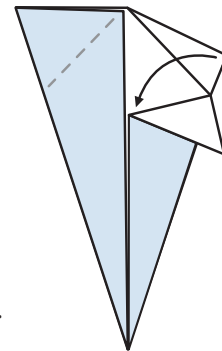

Step 4.

Fold the top left and right corners of triangle inward, meeting at the center. Make a crease on either side and fold back out.

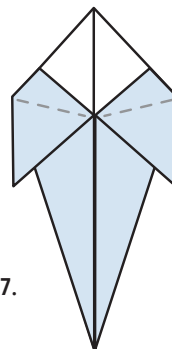

Step 5.

Take inside right corner flap (where arrow begins) and pull outward. Take top right folded corner and fold inward to meet the opposite corner in the center.

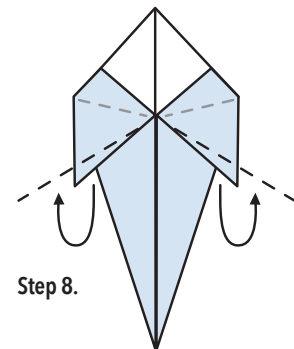

Step 6.

Right side should resemble a parallelogram as in diagram above. Repeat step 6 on left side.

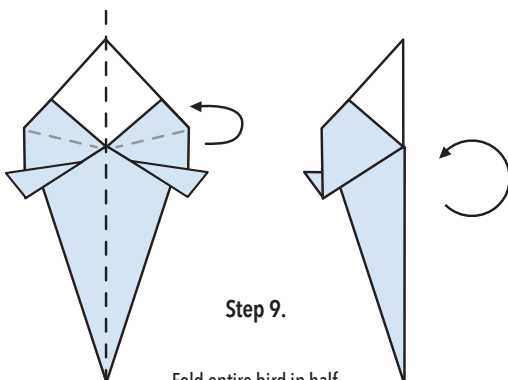

Step 7.

Both left and right sides are now folded down, as shown above.

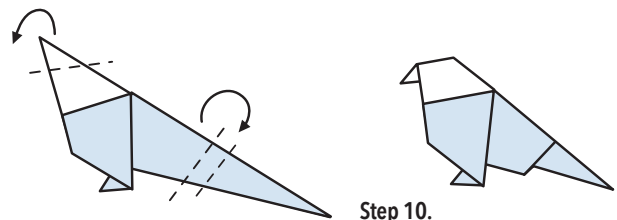

Step 8.

Take both left and right corners that are pointing down, and fold them up and over where the dark dotted line shows to make feet.

Step 9.

Fold entire bird in half lengthwise and turn 90 degrees counter clock wise.

Step 10.

Take head of bird and fold tip down and inward and fold tail inward, making a small pleat, to resemble final diagram of bird to the right.
